

Your product requires testing and you're not sure how to handle it...We Do!

Genesis Automation can help you solve your product testing needs. Whether you need mechanical or electrical tests performed on your product, in a specific environment or not, we can come up with a solution that will fit your application.

Test Capabilities

- Durability / Lab Testing
- Production "In Process" Testing
- Production Line Final Testing

■ Mechanical Durability and Electrical Functionality

- Mechanical:
 - Torque
 - Force
 - Flow Test
 - Leak Test
- Electrical:
 - Hi-Pot
 - Continuity
 - Current
 - Voltage
 - Temperature

Everything from Lab to Production Testing!

■ Sensing Presence

- NIST Traceable Instrumentation
- Quality:
 - Functionality
 - Durability
 - Presence
 - Vision Inspection

■ Temperature Sensing

We can help you get the data you need.....

- Genesis can collect the data you want and present it in just about any form you need it in. Statistical Process Control charts and graphs.....no problem!

- Analog signals from transducers translated into hard data and compared to pass / fail criteria.

- Vision Inpection, placement, detection....

- Specialized light measurement applications.

- Temperature applications with monitoring capabilities.

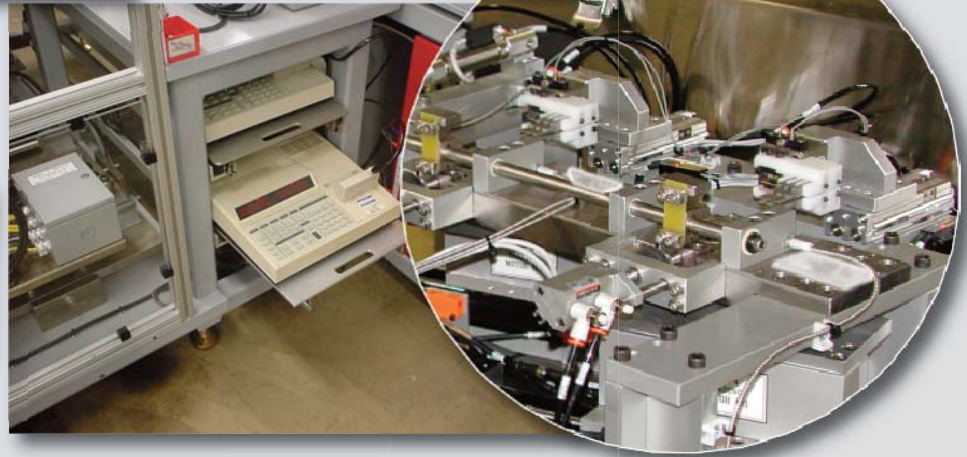

- A specific application included collecting and recording 14.2 million data points per cycle

- Automated Calibration and / or Verification Built into our system....

- Electrical tests for correct circuitry using custom circuits and special instrumentation.

Systems that Work.....
